Please find below and/or attached an Office communication concerning this application or proceeding.

#### Application No. Applicant(s) Advisory Action 09/929.703 FRIEDRICH, ULRICH Before the Filing of an Appeal Brief **Examiner Art Unit** Freshteh N. Aghdam 2611 --The MAILING DATE of this communication appears on the cover sheet with the correspondence address --THE REPLY FILED 12 June 2006 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. 1. The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods: a) The period for reply expires <u>3</u> months from the mailing date of the final rejection. b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. Examiner Note: If box 1 is checked, check either box (a) or (b), ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f). Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). NOTICE OF APPEAL 2. The Notice of Appeal was filed on . A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a). 3. The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will <u>not</u> be entered because (a) They raise new issues that would require further consideration and/or search (see NOTE below); (b) They raise the issue of new matter (see NOTE below); (c) They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or (d) They present additional claims without canceling a corresponding number of finally rejected claims. NOTE: \_\_\_\_\_. (See 37 CFR 1.116 and 41.33(a)). 4. The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324). 5. Applicant's reply has overcome the following rejection(s): 6. Newly proposed or amended claim(s) \_\_\_\_\_ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s). 7. 🔲 For purposes of appeal, the proposed amendment(s): a) 🔲 will not be entered, or b) 🔲 will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended. The status of the claim(s) is (or will be) as follows: Claim(s) allowed: 13. Claim(s) objected to: Claim(s) rejected: 1-3,5,7,10,14 and 16-31. Claim(s) withdrawn from consideration: \_\_\_\_ AFFIDAVIT OR OTHER EVIDENCE 8. The affidavit or other evidence filed after a final action, but before or on the date of filing a Notice of Appeal will not be entered because applicant failed to provide a showing of good and sufficient reasons why the affidavit or other evidence is necessary and was not earlier presented. See 37 CFR 1.116(e). 9. The affidavit or other evidence filed after the date of filing a Notice of Appeal, but prior to the date of filing a brief, will not be entered because the affidavit or other evidence failed to overcome all rejections under appeal and/or appellant fails to provide a showing a good and sufficient reasons why it is necessary and was not earlier presented. See 37 CFR 41.33(d)(1). 10. The affidavit or other evidence is entered. An explanation of the status of the claims after entry is below or attached. REQUEST FOR RECONSIDERATION/OTHER 11. 🛛 The request for reconsideration has been considered but does NOT place the application in condition for allowance because: see attachment. 12. Note the attached Information Disclosure Statement(s). (PTO/SB/08 or PTO-1449) Paper No(s). 13. Other: \_\_\_\_\_.

### **DETAILED ACTION**

## Response to Arguments

Applicant's arguments filed 6/12/2006 have been fully considered but they are not persuasive.

Applicant's Arguments: On page 3, applicant argues "the additional information cannot be the same as the data i.e. must be distinct from the data. Otherwise, one would be transmitting the same redundant or duplicative information rather than more information in a given amount of time." On page 4, applicant argues "a person of ordinary skill in the art would have readily understood that "control signals" are distinct from the "coded data words" that are encoded and transmitted in the signal, because "control signals" control the operation of the receiver, while the "coded data words" convey the actual useful data that is to be used by or further processed in the receiver." On page 5, applicant argues "the transmitted system frequency must involve additional information in addition to and distinct from the "data words", because in fact the system frequency is used for decoding the data words." On page 5, applicant argues "the modulation indices convey additional information in addition to and distinct from the data words to variably set the data rate."

Examiner's Response: The examiner disagrees with the argument presented after final that one of ordinary skill would readily understand that the additional must be distinct from the data. The additional information could be information embedded in the data such as an embedded clock signal. The additional information could be the

Application/Control Number: 09/929,703

Art Unit: 2611

additional information as presented in the reference disclosed in the previous non-fiinal office action rejecting the claims (the data type that is bipolar). Newly added limitations must be supported through express, implicit or inherent disclosures (MPEP 2163). The assertions by applicant are not supported through these disclosures. It is unclear what the control signals represent in the specification since no definition is provided. Control signals that are not distinct from the data have been described above. Regarding the argument from page 5, it is unclear how the data rate is distinct from the data. It would seem that the data and the data rate are related to one another. IEEE dictionary of standard terms defines control signals "any signal that purposely affects the recording processing, transmission or interpretation of data by a system element." A control signal is not inherently distinct form data.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Freshteh N. Aghdam whose telephone number is (571) 272-6037. The examiner can normally be reached on Monday through Friday 9:00-5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chieh Fan can be reached on (571) 272-3042. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
